

# Partner with a certified SAP expert and create a custom environment.

**Decisive lets you take advantage of SAP enterprise management and operations solutions with a trusted cloud provider.**

**Keep your business moving forward with secure, cloud-based enterprise management and operations solutions from one of the few SAP, native cloud providers in Canada. An SAP partner, Decisive provides certified experience and expertise in the full range of SAP-based cloud and infrastructure solutions.**

**Application software, analytics offerings, management solutions, and more—Decisive and SAP provide everything you need to improve efficiency, increase productivity, and help your employees get back to business.**

## **Optimize business processes.**

Integrate your onsite information technology infrastructures with Decisive's SAP cloud platform and harness both the full power of your data and the benefits of SAP solutions.

Decisive's SAP cloud platform can be used to create new applications or extend existing applications in a secure cloud computing environment that will transform and simplify your business operation.

With Decisive as your SAP cloud partner and our SAP partner network, you get fully integrated solutions and end-to-end service and support for installation, deployment, and development within the Decisive Cloud.

## Build the SAP environment you need.

Why settle for isolated applications that only address specific data management requirements? As your one-stop shop for all SAP solutions, our comprehensive assessment capabilities and superior knowledge of SAP technology ensure you get the best solutions for your unique business needs.

Decisive can quickly get your operation running at its best with end-to-end SAP integration services:

**Turnkey solutions**—Enable successful digital transformations with a secure, SAP-based Decisive cloud solution built on a clear strategy and supported by software that ties all business processes together—in real time and in a single view to facilitate enterprise-wide information sharing.

**Management consulting**—Negotiate obstacles, prepare for challenges, determine the best SAP solution for your changing needs, and move confidently through your digital transformation process with Decisive's end-to-end SAP consulting services.

**Application management**—Support day-to-day SAP application requirements with Decisive experts who are certified in the full breadth of SAP solutions.

## Leverage a secure cloud.

Regardless of where your SAP journey takes you, Decisive's secure cloud platform will help you get the real value from your data. We offer the expertise to ensure you get the highest levels of satisfaction, solution quality, and service delivery that your business needs from public, private, and hybrid cloud infrastructures.

Because SAP runs natively on the Decisive Cloud, it's easier for you to optimize your applications, scale services, extend your reach, support daily operations, and run disaster recovery compared to options that must run SAP on additional hardware.

**Continuous improvement**—Maximize your SAP investment by applying continuous improvement of SAP-based processes and technologies through Decisive's ongoing health checks and value assessments.

**SAP S/4HANA migration**—Get all the benefits of an SAP S/4HANA Intelligent ERP system on Decisive's secure cloud platform with a seamless migration built on a strategic business case, roadmap, and ongoing support.

**Cloud hosting**—Leverage our secure cloud platform for all your SAP application requirements and get the highest levels of security and flexibility available for your public, private, or hybrid cloud environment.
