

———— **Backup with Confidence, Recover with Assurance**

Secure Backup & Recovery

Empower your data journey from secure backup to resilient recovery, safeguard your digital assets every step of the way.

Secure Backup & Recovery for Microsoft 365

With our Secure Backup and Recovery Solutions, safeguard your critical data against **loss, breaches, and downtime**. Ensure continuous access and complete protection for your M365 environment, where your business continuity is our top priority.

Shared Responsibility.

Businesses rely heavily on Microsoft 365 for seamless collaboration, communication, and data management. However, the increasing volume and complexity of data brings forth unprecedented challenges and risks.

The Shared Responsibility Model employed by Microsoft is a critical aspect often overlooked by many businesses. As organizations migrate their operations to the cloud, the misconception that Microsoft shoulders the entire burden of data protection leaves them vulnerable to potential data loss.

This shared responsibility model necessitates a closer examination and comprehensive backup strategy, ensuring that businesses have the resilience required to navigate unforeseen challenges and safeguard their critical Microsoft 365 data.

Enhance your Microsoft 365 experience

Discover how our Microsoft 365 backup and recovery solution, powered by Commvault, provides peace of mind and keeps your business resilient in the face of digital challenges

Resiliency Redefined.

Robust Security

Decisive Group ensures that your backup data is secure and compliant, with multi-layered encryption, immutability, access control, and audit trails monitored by Decisive Groups SOC

Comprehensive Coverage

Decisive Group protects your data across all Microsoft 365 apps, including Exchange, Teams, SharePoint, OneDrive, and more.

Granular Recovery

Decisive Group enables you to quickly and easily restore your data at any level, from individual items to entire applications. You can also perform point-in-time, in-place, or out-of-place recovery, depending on your needs.

Flexible Storage

Decisive Group leverages Commvault's deduplication and compression features to reduce your storage costs and improve your backup performance no matter where your storage resides.

Proven Reliability

Commvault is trusted by thousands of customers and partners worldwide, including Microsoft itself, to protect their Microsoft 365 data.

Defending Your Business.

Decisive Group stands as your trusted partner in safeguarding what matters most – your data.

Our robust secure backup and recovery solution, meticulously designed for seamless integration with Microsoft 365, ensures that your organization is shielded against unforeseen challenges and data loss.

As we navigate the digital landscape together, let **Decisive Group be your beacon of resilience**, offering not just a service but a commitment to the uninterrupted flow of your operations. Take the proactive step towards unmatched data security and resilience by partnering with Decisive Group.
